## PROFESSIONAL SUMMARY

Adaptable Computer Science student at Laikipia University, graduating in November 2026, seeking a graduate role with a reputable organisation. Completed three attachments between May 2024 and July 2026 in three different settings: a university ICT environment, a software engineering training programme and a public medical training college. Combines technical grounding in TypeScript, React, Node.js, PostgreSQL, Linux and networking with problem solving, user support and teamwork. Learns new tools quickly, works well in agile teams and is ready to grow into new functions and industries.

## KEY STRENGTHS

- **Adaptability:** Moved between hardware support, software development and team projects across three different workplaces.
- **Problem Solving:** Troubleshot and repaired computer hardware across an institution and tested software with Jest unit tests.
- **Teamwork and Communication:** Worked in agile teams, contributed UI/UX designs in Figma and collaborated with ICT staff. Fluent in English and Kiswahili.
- **Learning Agility:** Studied Linux, networking, APIs, blockchain and AI fundamentals (Cisco, 2025) alongside a full degree programme.
- **User Focus:** Built systems for hotel guests, mothers, caregivers and healthcare providers, and led an institutional inventory system frontend.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, C#, HTML5, CSS3

**Frontend:** React, Next.js, Redux Toolkit, Tailwind CSS, Responsive Design

**Backend:** Node.js, Express.js, RESTful APIs, JWT, Role-Based Access Control

**Databases:** PostgreSQL, MySQL, Drizzle ORM, Database Modelling

**DevOps, Testing and Tools:** Git, GitHub, CI/CD Pipelines, AWS, Postman, Unit Testing (Jest), Linux Command Line

**Design and Methods:** Agile, API Design, UI/UX Design (Figma)

**ICT Support:** Hardware Troubleshooting, Networking, Blockchain Fundamentals

## PROFESSIONAL EXPERIENCE

**ICT Attaché, Kenya Medical Training College (KMTC) Headquarters**

*Nairobi, Kenya | May 2026 to July 2026*

- Developed the ICT Inventory Management System as lead Frontend Developer.
- Maintained, troubleshot and repaired computer hardware across the institution, providing hands-on ICT support.
- Worked with ICT staff in a team environment, applying classroom knowledge to live operations.

**Software Engineering Attaché, Teach2Give**

*Laikipia, Kenya | May 2025 to July 2025*

- Built and deployed full-stack applications with React, TypeScript, Express.js and PostgreSQL, with efficient database management.
- Implemented JWT authentication, wrote unit tests with Jest and improved code quality through CI/CD pipelines.
- Contributed UI/UX designs in Figma, API integration and database modelling within agile teams.
- Worked across all three layers of delivery: frontend, backend and DevOps.

**Internal Attachment, Laikipia University**

*Laikipia, Kenya | May 2024 to July 2024*

- Assembled computers, identified components and diagnosed hardware faults.
- Worked with Linux operating systems, including command-line navigation, file management and system configuration.
- Applied networking concepts including IP addressing and network topology and configured network devices.
- Studied API design and integration, and blockchain fundamentals including distributed ledgers and smart contracts.

## PROJECTS

**Hotel Room Booking System** | Code: GITHUB

*Tech stack: React.js, TypeScript, Tailwind CSS, Redux Toolkit, Node.js, Express.js, Drizzle ORM, PostgreSQL*

- Designed and built a booking platform that lets guests check room availability, book online and pay securely, and gives administrators tools to manage three core areas: rooms, bookings and payments.

**Maternal Care System** | Code: GITHUB

*Tech stack: React, TypeScript, Express, Node.js*

- Built a web-based system supporting mothers and caregivers through pregnancy and early childhood, with five core modules: symptom tracking, trimester-specific guidance, AI-assisted support, emergency alerts and child development monitoring.
- Added dashboards and predictive analytics to help healthcare providers and policymakers improve maternal and child health outcomes.

**Portfolio Website** | Live: PORTFOLIO LINK

*Tech stack: React.js, TypeScript, Tailwind CSS, Node.js, Express.js*

- Designed and developed a personal portfolio presenting selected projects, technical skills and experience in a clean, modern layout.

## EDUCATION

**BSc Computer Science, Laikipia University**

*Laikipia, Kenya | September 2022 to November 2026 (expected)*

- Expected graduation: November 2026. Relevant coursework: Data Structures, Web and Distributed Systems, RESTful APIs, Cloud Computing.

## CERTIFICATIONS AND TRAINING

- Software Engineering Program, Teach2Give (2025)
- Introduction to Modern AI, Cisco (2025)

## LANGUAGES

English (Fluent) | Kiswahili (Fluent)

## REFEREES

**Samuel Rotich**, Computer Technologist, Laikipia University

+254 725 309 040 | srotich@laikipia.ac.ke

**Mr. Nelson Rono**, Deputy ICT Manager, Kenya Medical Training College Headquarters

+254 726 470 140 | nrono@kmtc.ac.ke

**Mr. Denis Wachira**, Software Engineer and Trainer TEACH2GIVE
